

2016 – 2017 PLANT PRICE LIST

- ⊗ The Nursery is open Monday 8.30am – 4.30pm or otherwise by appointment.
- ⊗ All our plants are grown from locally collected seed. We aim to match our seed collection to your plant order.
- ⊗ Most of our stock is grown in 3cm forestry tubes.
- ⊗ **Please order by January 2017** to enable us to source appropriate seed. Some species are slow to grow or may fail to germinate, a minimum of 5 months may be required to produce your order.
- ⊗ We can assist in compiling your species list if required. A fee may apply to cover additional time.
- ⊗ A 20% deposit is required to confirm your order. Payment on collection of plants can be made by cash, direct debit or cheque.
- ⊗ Plants will be ready autumn 2017 onwards. You will be notified when plants are ready for collection.

Plant Costs	
SEED GROWN PLANTS	
100 plants	\$2.50
100 to 300 plants	\$2.00
300 plants	\$1.50
CUTTING GROWN and RARE PLANTS	
per plant	\$3.00
** denotes	

- ⊗ Some grass and sedge species are available in either tubes or hyko trays.
Hyko trays are \$40 and consist of 40 plants/tray.
- ⊗ A variety of Australian native plants suited to local gardens are available including advanced trees and shrubs, please enquire or come in for a look.
- ⊗ Coreflute guards, hardwood stakes and weed mats can be purchased from the nursery.
To order guards, stakes and weed mats, please go to page 11 of order form.

Orders can be made via online, email or post

TREES

Number Request	Latin Name	Common Name	Comments
	<i>Acacia dealbata</i>	Silver Wattle	Fast growing, excellent for habitat and erosion control. Suckers.
	<i>Acacia implexa</i>	Lightwood Wattle	Tough and long lived. Good for shade, shelter and gully erosion.
	<i>Acacia mearnsii</i>	Black Wattle	Excellent habitat. Fast growing. Can sucker after disturbance.
	<i>Acacia melanoxylon</i>	Blackwood Wattle	Useful in riparian plantings. Wind/fire breaks and erosion control.
	<i>Allocasuarina leuhmannii</i>	Buloke	Long lived and nitrogen fixing. Sensitive to fire and grazing damage.
	<i>Allocasuarina littoralis</i>	Black She-oak	Long lived. Good for habitat and shelterbelts.
	<i>Allocasuarina verticillata</i>	Drooping She-oak	Long lived. Tolerates strong winds. Good for habitat and shelterbelts.
	** <i>Banksia marginata</i>	Silver Banksia	Large shrub or small tree for shelter and habitat. Good nectar producer.
	** <i>Brachychiton populneus</i>	Kurrajong	Cylindrical or slightly bulbous trunk and dense crown. Found scattered on the northern plains.
	<i>Callitris glaucophylla</i>	White Cypress-pine	Straight trunked tree found in woodlands, or granitic outcrops. Slow growing, termite resistant wood.
	<i>Eucalyptus albens</i>	White Box	Tough, attractive shade and shelterbelt tree with blue foliage. Good habitat.
	<i>Eucalyptus behriana</i>	Bull Mallee	Hardy, multi stemmed small tree to 12m high.
	<i>Eucalyptus blakelyi</i>	Blakely's Red Gum	Medium sized tree, locally common on woodlands.
	<i>Eucalyptus camaldulensis</i>	River Red Gum	Large spreading tree for shade, habitat, stream and gully erosion.
	<i>Eucalyptus camphora</i>	Mountain Swamp Gum	Useful for gully erosion and boggy areas. Good habitat.
	<i>Eucalyptus dives</i>	Broad-leaved Peppermint	Good shade and habitat tree. Useful in shelterbelts.
	<i>Eucalyptus globulus ssp. bicostata</i>	Blue Gum	Quick growing large tree for shade, shelter and habitat.
	<i>Eucalyptus goniocalyx</i>	Long Leaf Box	For shade, shelter and general habitat planting.
	<i>Eucalyptus leucoxylon ssp. pruinosa</i>	Yellow Gum	Varies from small to medium tree (up to 25m), smooth bark with long flowering period.
	<i>Eucalyptus macrorhyncha</i>	Red Stringybark	Good revegetation tree, hardy. Keep fenced from stock.
	<i>Eucalyptus melliodora</i>	Yellow Box	Attractive. Variable in form. Habitat, shade and soil stabilisation values.
	<i>Eucalyptus microcarpa</i>	Grey Box	Long lived. Good for habitat, gully erosion and shelter.
	<i>Eucalyptus obliqua</i>	Messmate	Habitat and shelterbelts. Regenerates readily after fire.
	<i>Eucalyptus ovata</i>	Swamp Gum	Plant on creek flats and swampy areas. Good habitat.

TREES - continued

	<i>Eucalyptus pauciflora</i>	Snow Gum	Generally occurring above 1000m. Often a crooked, branching trunk, with smooth white and grey bark.
	<i>Eucalyptus polyanthemos</i>	Red Box	Hardy. Useful for shade, shelter and habitat. Medium size tree with blue foliage.
	<i>Eucalyptus polybractea</i>	Blue Mallee	Multi-stemmed small tree with blue grey foliage. Commonly known for its eucalyptus essential oil.
	<i>Eucalyptus radiata</i>	Narrow-leaved Peppermint	Attractive upright tree for shelterbelts and habitat areas.
	<i>Eucalyptus rubida</i>	Candlebark	Excellent habitat tree with hollows. Attractive white/grey/pink bark.
	<i>Eucalyptus tricarpa</i>	Red Ironbark	Hardy, medium sized tree with deeply fissured black bark. Long flowering period.
	<i>Eucalyptus viminalis</i>	Manna Gum	Excellent habitat. Bark sheds in ribbons.
	<i>Eucalyptus viridis</i>	Green Mallee	Small tree to 8m. Rough bark at base with smooth trunk and branches. Compact crown of shiny green leaves. Hardy.
	TOTAL TREE ORDER		

UNDERSTOREY SHRUBS

Number Request	Latin Name	Common Name	Comments
	<i>Acacia acinacea</i>	Gold Dust Wattle	Good habitat and low screen. Responds to browsing. Self seeds.
	<i>Acacia aspera</i>	Rough Wattle	Medium shrub with hairy leaves and pods.
	<i>Acacia flexifolia</i>	Bent-leaf Wattle	Fairly dense, round, small shrub. Isolated populations in Victoria.
	<i>Acacia genistifolia</i>	Spreading Wattle	Fast growing. Open, spreading and prickly. Good bird refuge.
	<i>Acacia gunnii</i>	Ploughshare Wattle	Small, rare wattle. May occur as a ground cover or small shrub.
	<i>Acacia lanigera</i>	Woolly Wattle	Low shelterbelt cover. Early flowering – provides colour in winter.
	<i>Acacia leprosa</i>	Cinnamon Wattle	Variable. Fast growing. Good for habitat and shelterbelts.
	<i>Acacia mitchelli</i>	Mitchell's Wattle	Silver coloured wattle, occurring as a low shrub or ground cover. Locally rare.
	<i>Acacia montana</i>	Mallee Wattle	Dense, rounded, rather sticky green shrub. Mostly found in mallee scrub and box ironbark forest.
	<i>Acacia paradoxa</i>	Hedge Wattle	Prickly. Good for bird habitat and shelterbelts.
	<i>Acacia penninervis</i>	Hickory Wattle	Densely foliated shrub. Isolated population in the Strathbogie Ranges.
	<i>Acacia pravissima</i>	Ovens Wattle	Shrub or small tree found near streams or damp sheltered sites.
	<i>Acacia pycnantha</i>	Golden Wattle	Fast growing. Short lived. Readily self seeds.
	<i>Acacia rubida</i>	Red Stem Wattle	Shelterbelt shrub for hills and mountain areas. Soil binder.
	<i>Acacia verniciflua</i>	Varnish Wattle	Attractive shrub for shelter, erosion control and habitat.
	<i>Bursaria spinosa</i>	Sweet Bursaria	Hardy and adaptable. Prickly. Habitat for birds and butterflies.
	<i>Callistemon sieberi</i>	River Bottlebrush	Hardy streamside shrub. Stabilises banks. Good habitat.
	** <i>Calytrix tetragona</i>	Fringe Myrtle	Erect to spreading shrub 0.5 to 2m. Small aromatic leaves with white to pink flowers. Hardy.
	<i>Cassinia aculeata</i>	Common Cassinia	Fast growing pioneer species. Colonises bare ground. Good shelter and habitat.
	<i>Cassinia arcuata</i>	Drooping Cassinia	Graceful, easily grown shrub. Readily colonises disturbed areas.
	<i>Cassinia longifolia</i>	Shiny Cassinia	Fast growing. Easily established shrub for bare ground, shelter and habitat.
	<i>Cassinia ozothamnoides</i>	Cottony Haeckeria	Small shrub with curry smelling leaves. Profuse and conspicuous flowerheads.
	** <i>Coprosma quadrifida</i>	Prickly Currant-bush	Upright shrub 2-4m. Small olive green leaves with small red berries. Prefers semi-shaded position in moist soil.

UNDERSTOREY SHRUBS - continued

	**Correa glabra	Rock Correa	Dense medium sized shrub. Prefers well drained soils, full sun to part shade. Green or red bell shaped flowers.
	**Correa lawrenciana	Mountain Correa	Tall shrub found in taller forests. Bears yellow-green flowers. Honeyeater food source.
	**Correa reflexa	Common Correa	Medium sized shrub – excellent for dry, shady sites. Nectar source for honeyeaters.
	<i>Daviesia benthamii</i>	Spiny Bitter Pea	Dense small shrub with yellow-brown flowers.
	<i>Daviesia latifolia</i>	Hop Bitter Pea	Interesting foliage and flowers. Plant in clumps. Good habitat and shelter.
	<i>Daviesia leptophylla</i>	Narrow Leaved Bitter Pea	Useful in habitat and shelter plantings. Plant in clumps.
	<i>Daviesia ulicifolia</i>	Gorse Bitter Pea	Prickly. Good bird habitat. Attractive pea flowers.
	<i>Dillwynia cinerascens</i>	Grey Parrot Pea	Low attractive shrub for understory plantings on drier sites.
	<i>Dillwynia juniperina</i>	Prickly Parrot Pea	Prickly shrub of 1 – 2 metres. Small yellow and red flowers clustered at the end of branches.
	<i>Dillwynia sericea</i>	Showy Parrot Pea	Good understory plant. Does well under established trees. Showy flowers.
	<i>Dodonaea boroniifolia</i>	Fern-leaf Hop Bush	Spreading, dense shrub. Useful as a low windbreak and very decorative.
	<i>Dodonaea viscosa ssp. angustissima</i>	Slender Hop Bush	Excellent habitat for insects and small birds.
	<i>Dodonaea viscosa ssp. cuneata</i>	Wedge leaf Hop Bush	Erect shrub to 2m. Excellent habitat, ornamental, good low windbreak.
	<i>Eutaxia diffusa</i>	Spreading Eutaxia	Variable shrub to 1.5m. Yellow and purple flowers.
	<i>Eutaxia microphylla</i>	Common Eutaxia	Heath like shrub to 1m. Profuse yellow and red flowers. Good habitat.
	<i>Gompholobium huegelii</i>	Common Wedge-pea	Erect or spreading shrub to 1m. Found naturally in dry sandy to gravelly soils. Pale to bright yellow flowers.
	**Grevillea alpina	Cat's Claw Grevillea	Variable small shrub with attractive red and yellow flowers. Excellent habitat.
	<i>Indigofera australis</i>	Austral Indigo	Attractive mauve flowers. Good habitat.
	<i>Kunzea parvifolia</i>	Violet Kunzea	Erect shrub to 1.5m. Slender wiry reddish branches with small leaves. Pink to purple flowers. Prefers moist soils.
	<i>Leptospermum continentale</i>	Prickly Tea Tree	Likes swampy sites. Excellent plant for habitat and erosion control.
	<i>Leptospermum lanigerum</i>	Woolly Tea Tree	Excellent for habitat, stream and gully erosion. Requires very wet sites.
	<i>Leptospermum obovatum</i>	River Tea Tree	Excellent for habitat, stream and gully erosion. Requires very wet sites.

UNDERSTOREY SHRUBS - continued

	<i>Melaleuca parvistaminea</i>	Rough-barked Honey-myrtle	Valuable for riparian habitat. Controls gully erosion. Can form thickets.
	<i>Melicytus dentatus</i>	Tree Violet	Hardy. Useful for habitat and erosion control. Strong floral perfume.
	<i>Mirbelia oxylobioides</i>	Mountain Mirbelia	Spreading, open branched shrub with small leaves. Bright orange/red flowers. Important understorey species.
	** <i>Olearia argophylla</i>	Musk Daisy Bush	Fast growing large shrub with profuse flowers in Spring. Requires sheltered site on deep soils.
	<i>Olearia lirata</i>	Snow Daisy Bush	Soft open shrub to 4m. Requires sheltered site on deep soils.
	<i>Olearia phloggopappa</i>	Dusty Daisy Bush	Spreading shrub to 2m. Leaves green above and greyish-white underneath. White flowers. Requires moist soils.
	<i>Ozothamnus obcordatus</i>	Grey Everlasting	An erect slender shrub with shiny foliage. Hardy. For shelter and habitat.
	** <i>Pimelea axiflora</i>	Bootlace Bush	Shrub to 3m. Opposite narrow leaves, white flowers. Prefers high rainfall moist conditions.
	** <i>Pimelea humilis</i>	Common Rice-flower	Small erect shrub to 0.5m. Creamy white clusters of flowers. Widespread and hardy.
	<i>Pittosporum angustifolium</i>	Weeping Pittosporum	Shrub to small tree (10m). Drooping branches with orange fruit and cream flowers. Prefers sandy well drained soils.
	<i>Pomaderris aspera</i>	Hazel Pomaderris	Large shrub or small tree for stream sides and sheltered, moist sites.
	<i>Pomaderris prunifolia</i>	Prunus Pomaderris	Shrub occurring on rocky sites not far from watercourses. Requires well drained soils and semi shade.
	<i>Prostanthera lasianthos</i>	Victorian Christmas Bush	Attractive large shrub for stream sides and moist gullies.
	<i>Pultenaea daphnoides</i>	Large Leaf Bush Pea	Hardy. Useful for shelterbelts and general understorey planting.
	<i>Pultenaea humilis</i>	Dwarf Bush Pea	Erect to prostrate shrub to 0.2-0.8m. Soft hairy foliage with yellow and red pea flowers.
	<i>Pultenaea largiflorens</i>	Twiggy Bush Pea	Orange red pea flowers. An important component of understorey. Excellent habitat and nitrogen fixing.
	<i>Pultenaea laxiflora</i>	Loose Flower Bush Pea	Low spreading shrub – often prostrate. Orange and red pea flowers.
	<i>Pultenaea pedunculata</i>	Matted Bush-pea	Prostrate, mat forming shrub. Showy yellow pea flowers.
	<i>Pultenaea procumbens</i>	Heathy Bush-pea	Small shrub up to 1m. Orange and red pea flowers. Hardy.
	<i>Pultenaea williamsonii</i>	Highland Bush-pea	Low growing, spreading shrub, often prostrate.
	<i>Senna artemisioides</i> subsp. <i>zygophylla</i>	Narrow Leaf Desert Cassia	Hardy shrub 1 – 3 metres high. Fast growing and short lived. Golden yellow flowers
	<i>Viminaria juncea</i>	Golden Spray	Erect shrub to small tree. Tolerates water-logging. Fast growing. Long drooping yellow sprays.
	TOTAL UNDERSTOREY SHRUBS ORDER		

GROUNDCOVERS & CLIMBERS

Number Request	Latin Name	Common Name	Comments
	<i>Acacia aculeatissima</i>	Thin Leaf Wattle	Hardy prostrate or low sprawling shrub.
	** <i>Billardiera scandens</i>	Common Apple-berry	Shrubby climber or scrambler. Cream to greenish-yellow tubular flowers later becoming green fleshy fruits, both beneficial for birds.
	<i>Bossiaea prostrata</i>	Creeping Bossiaea	Fine, delicate prostrate pea with yellow and red pea flowers. Nitrogen fixing.
	<i>Chenopodium desertorum</i> <i>ssp. microphyllum</i>	Frosted Goosefoot	Small shrub about 30cm high. Useful forage plant which is moderately acceptable to stock.
	<i>Clematis aristata</i>	Mountain Clematis	Vigorous woody climber to 6m high. Prolific white attractive flowers. Prefers moist or sheltered sites.
	<i>Clematis microphylla</i>	Small-leaved Clematis	Woody, twining climber to 5m high. Cream flowers with showy 'fluffy' seedheads. Dry sandy sites.
	<i>Einadia hastata</i>	Saloop	Neat, rounded, perennial small shrub. Relatively palatable forage for stock. Food plant for caterpillars. Salt tolerant. Hardy.
	<i>Einadia nutans</i>	Nodding Saltbush	Herbaceous perennial with trailing branches. Palatable forage plant. Salinity tolerant. Food plant for caterpillars. Hardy.
	<i>Enchylaena tomentosa</i>	Ruby Saltbush	Prostrate, spreading or erect shrub to 1.5m. Green to bluish, hairy, succulent leaves with bright pink edible berries. Hardy.
	<i>Glycine clandestina</i>	Twining Glycine	Slender, light climber. Hardy once established.
	<i>Glycine tabacina</i>	Variable Glycine	Small, delicate scrambler or climber. Blue to mauve flowers. Good habitat for butterfly caterpillars. Nitrogen fixing.
	<i>Hardenbergia violacea</i>	Happy Wanderer, Purple Coral Pea	Climbing or prostrate scrambler. Showy purple pea flowers. Good habitat.
	<i>Kennedia prostrata</i>	Running Postman	Trailing or matted perennial. Scarlet pea flowers. Good habitat.
	<i>Platylobium formosum</i>	Handsome Flat-Pea	Trailing, prostrate, scrambling shrub with yellow and red flowers. Likes shade, fertile soils. Good habitat and nitrogen fixing.
	<i>Platylobium montanum</i>	Mountain Flat-Pea	Trailing, prostrate, scrambling shrub. Likes shade, high rainfall sites. Good habitat and nitrogen fixing.
	** <i>Templetonia stenophylla</i>	Leafy Templetonia	Small, straggling shrub with small cream flowers. Nitrogen fixing.
	** <i>Tetradthea ciliata</i>	Pink-bells	Slender clumping shrub to 1m. Attractive deep pink-lilac flowers. Moist to dryish soils, full sun to part shade.
	** <i>Veronica plebeia</i>	Trailing Speedwell	Creeping perennial herb, rooting at leaf nodes. Small violet flowers. Well drained soils, hardy.
	** <i>Veronica perfoliata</i>	Diggers Speedwell	Low growing shrub with an arching habit, grows to 0.3 – 1m in height. Pale grey foliage with attractive sprays of pale mauve flowers. Hardy.
TOTAL GROUNDCOVERS & CLIMBERS ORDER			

WILDFLOWERS, HERBS & LILIES

Number Request	Latin Name	Common Name	Comments
	<i>**Ajuga australis</i>	Austral Bugle	Small herb with rosette leaves. Blue violet flowering stem.
	<i>Arthropodium fimbriatum</i>	Nodding Chocolate-lily	Tufted perennial herb with mauve or purple fragrant flowers. Plant in groups.
	<i>Arthropodium minus</i>	Small Vanilla-lily	Tufted perennial herb. Plant in groups.
	<i>Arthropodium strictum</i>	Chocolate Lily	Tufted perennial herb. Attractive flowers on long stems.
	<i>Brachyscome basaltica</i>	Swamp Daisy	Perennial herb with white flowers. Grows well in damp positions. Butterfly food.
	<i>Brunonia australis</i>	Blue Pincushion	Perennial herb with a small rosette of soft leaves. Striking deep blue pincushion shaped flowers.
	<i>Bulbine bulbosa</i>	Bulbine Lily	Tufted succulent perennial herb. Bright yellow flowers growing along main stalk. Plant in groups – will spread. Common and widespread.
	<i>Bulbine glauca</i>	Rock Lily	Tufted succulent perennial herb. Bright yellow flowers growing along main stalk. Plant in groups – will spread. Grows on rocky granitic sites.
	<i>Burchardia umbellata</i>	Early Nancy	Tufted succulent perennial herb. White with a dark brown line. Plant in groups.
	<i>Calocephalus citreus</i>	Lemon Beauty-heads	Erect perennial daisy. Long, bright yellow flower heads.
	<i>Chieranthera cyanea</i>	Blue Finger Flower	Small shrub with deep blue flowers.
	<i>Chrysocephalum apiculatum</i>	Common Everlasting	Variable, dense spreading, perennial herb. Long flowering. Soil binder.
	<i>Chrysocephalum semipapposum</i>	Clustered Everlasting	Variable in form. Long flowering with yellow flower clusters.
	<i>Convolvulus erubescens</i>	Pink Bindweed	Perennial with trailing or twining stems. Pink flowers through Spring and summer.
	<i>Coronidium scorpioides</i>	Button Everlasting	Woolly perennial herb with yellow flowers. Spreads easily.
	<i>Craspedia variabilis</i>	Billy Buttons	Erect herb with golden yellow flowers in globular heads.
	<i>Desmodium varians</i>	Slender Tick-trefoil	Perennial creeper – nitrogen fixing.
	<i>Dianella admixta</i>	Black-anther Flax-lily	Tufted perennial herb to 1m, forming mats with fibrous roots. Dark blue or violet flowers with black anthers.
	<i>Dianella longifolia</i>	Pale Flax-lily	Tufted perennial herb to 1m. Dark blue flowers on tall stems.
	<i>Dianella tasmanica</i>	Tasman Flax-lily	Robust tufting perennial with broad strap leaves. Prefers moist, shady sites.
	<i>Eryngium ovinum</i>	Blue Devil	Erect perennial herb with showy, metallic blue-purple flowers, surrounded by spiny bracts.
	<i>Isotoma axillaris</i>	Rock Isotome	Small, bushy perennial herb. Showy star-shaped flowers.
	<i>Leptohynchos squamatus</i>	Scaly Buttons	Small, perennial herb, often with hairy stems. Small, yellow button flowers.

WILDFLOWERS, HERBS & LILIES - continued

	<i>Leucochrysum albicans</i>	Hoary Sunray	Small everlasting yellow flower. Very pretty. Flowers early in Spring.
	<i>Linum marginale</i>	Native Flax	Slender, low upright perennial with blue flowers. Plant several together.
	<i>Microseris scapigera</i>	Yam Daisy	Dandelion looking plant. Major food source for Aboriginals.
	<i>Minuria leptophylla</i>	Minnie Daisy	Perennial herb to 0.5m, with white daisy flowers. Well drained soils, hardy.
	<i>Pelargonium australe</i>	Austral Stork's Bill	Clump forming perennial herb, may die back in hot weather. White/pink flowers with purple markings
	<i>Pycnosaurus globosus</i>	Drumsticks	Erect, perennial herb with long, woolly flowering stems. Flowers are a bright yellow, globular head.
	<i>Rhodanthe anthemoides</i>	Chamomile Sunray	Erect bushy herb with white paper daisy flowers. Prefers sandy, well drained soils.
	<i>Rhodanthe corymbiflora</i>	Paper Sunray	Erect, annual herb with grey foliage. White paper daisy flowers. Prefers well drained, moist soils.
	<i>Stylidium graminifolium</i>	Grass Trigger Flower	Tufted perennial with narrow leaves and spikes of pink flowers. Plant in clumps.
	** <i>Stypandra glauca</i>	Nodding Blue Lily	Tufted or shrubby perennial herb found in forest and woodland. Bright blue flowers.
	<i>Velleia paradoxa</i>	Spur Velleia	Short-lived perennial herb with a rosette of leaves and open heads of yellow flowers.
	<i>Vittadinia cuneata</i>	Fuzzy New Holland Daisy	Woody, annual or perennial herb with mauve flowers. Widespread in dry areas, hardy.
	<i>Wahlenbergia stricta</i>	Tall Bluebell	Widespread, perennial tufted herb. Blue flowers mostly between Oct – Jan.
	<i>Xerochrysum viscosum</i>	Sticky Everlasting	Showy, long lasting yellow flowers. Good for butterflies. Regenerates after fire. Hardy.
	TOTAL WILDFLOWERS, HERBS & LILIES ORDER		

GRASSES

Number Request	Latin Name	Common Name	Comments
	<i>Aristida behriana</i>	Brush Wire-grass	Tufted perennial found in drier areas. Seeds have three awns.
	<i>Aristida ramosa</i>	Purple Wire-grass	Tufted perennial preferring drier, rocky sites. Seeds have three awns.
	<i>Austrostipa densiflora</i>	Dense Spear Grass	Coarsely tufted perennial grass up to 1m high. Good habitat. Sharp awns.
	<i>Austrostipa elegantissima</i>	Feather Spear Grass	Coarsely tufted perennial grass up to 1m high. Good habitat. Sharp awns
	<i>Dichelachne hirtella</i>	Plume Grass	Erect flowerhead with thickly packed spikelets. Found in dry, often rocky country.
	<i>Elymus scaber</i>	Common Wheat Grass	Loosely tufted perennial grass. High forage value. Food plant for caterpillars of native butterflies and moths.
	<i>Lomandra filiformis</i>	Wattle Mat Rush	Hardy, low tufting perennial. Often persists in rough paddocks.
	<i>Lomandra longifolia</i>	Spiny Headed Mat Rush	Tough, large tussocky perennial. Good habitat for ground fauna. Prefers moist sites.
	<i>Microleana stipoides</i>	Weeping Grass	Tufted, slender perennial grass. Green all year. Great low maintenance native lawn.
	<i>Poa labillardieri</i>	Common Tussock Grass	Widespread along creek banks and alluvial flats. Tussocks are up to 1m in size.
	<i>Poa sieberiana</i>	Grey Tussock Grass	Widespread in a variety of habitats. Useful habitat for small birds and reptiles.
	<i>Rytidosperma caespitosum</i>	Common Wallaby Grass	Tufted perennial grass with fine leaves and fluffy seedheads. Important component of native pastures.
	<i>Rytidosperma pallidum</i> , (formerly known as <i>Joycea palliada</i>)	Red Anther Wallaby Grass	Robust, coarse, perennial tussock. Attractive red anther flowers. Prefers part shade, hardy once established.
	<i>Themeda triandra</i>	Kangaroo Grass	Tufted, perennial, deep rooted grass often tipped red. Moderate forage value. Useful 'green pick' during summer after rain.
	TOTAL GRASSES ORDER		

AQUATIC PLANTS & SEDGES

Number Request	Latin Name	Common Name	Comments
	<i>Alisma plantago-aquatica</i>	Common Water Plantain	Perennial herb with large leaves to 0.5m. Small white flowers on spike up to 1.2m. Grows in shallow water, can die back in cooler months.
	<i>Amphibromus nervosus</i>	Common Swamp Wallaby Grass	Tufted perennial grass with a graceful weeping habit, up to 1.2m. Ideal around dams and swamps..
	<i>Carex appressa</i>	Tall Sedge	Perennial bright green tufted plant to 1m with flowers spikes up to 1.2m. Prefers boggy conditions all year around. Use for erosion control.

AQUATIC PLANTS & SEDGES - continued

	<i>Carex fascicularis</i>	Tassel Sedge	Perennial bright green tufted plant with attractive fluffy seed heads to 1m. Prefers wet conditions all year round.
	<i>Carex inversa</i>	Knob Sedge	Perennial, dense tufting habit to 0.2m. Tolerates full sun, inundation and periodic dry periods.
	<i>Carex tereticaulis</i>	Rush Sedge	Perennial green tufted plant to 0.6m with flower spikes to 1.2m. Use for erosion control, prefers seasonally inundated wet conditions.
	<i>Cyperus exaltatus</i>	Flat Sedge	Robust, tussock sedge. Useful plant around wetlands and dams.
	<i>Lomandra longifolia</i>	Spiny Headed Mat Rush	Tough, large tussocky perennial. Good habitat for ground fauna. Prefers moist sites.
	<i>Lythrum salicaria</i>	Purple Loosestrife	Annual shrub with purple – pink flowers. Likes damp or flooded sites.
	<i>Myrophyllum sp.</i>	Milfoil	Small emergent wetland herb with feathery stems. Grows well in among wetland rushes, requires shallow seasonal water.
	<i>Persicaria hydropiper</i>	Water Pepper	Slender, annual herb to 1 metre. Common in damp spots, along creek banks and rivers.
	<i>Phragmites australis</i>	Common Reed	Semi-aquatic, bamboo-like perennial grass up to 4m high. Prefers fresh or brackish water up to 2m depth. Excellent for erosion control.
	<i>Poa labillardieri</i>	Common Tussock Grass	Widespread along creek banks and alluvial flats. Tussocks are up to 1m in size.
	<i>Triglochin procerum</i>	Water Ribbons	Long strappy leaves emerging from the water. Green flower spikes up to 70cm tall but often a lot smaller. Requires seasonal water.
